

Samuel Mutethia — AI Engineer

Ruiru, Kiambu, Kenya | samuelkiriianki@outlook.com | +254 793 731 716 | linkedin.com/in/samuel-kiriianki | github.com/kiriianki

Professional Summary

AI Engineer and Software Developer experienced in deploying production-ready ML systems, building LLM-based applications, and designing scalable backend services. Strong foundation in Python, PyTorch, Django, and cloud deployment workflows, with proven success delivering AI integrations that improve efficiency and decision-making.

Core Technical Skills

Languages & Scripting: Python, JavaScript, Java, Kotlin, SQL, Bash

ML / AI: PyTorch, Hugging Face, LangChain, RAG, Prompt Engineering, Model Fine-Tuning

Web / APIs: Django, Flask, FastAPI, Next.js, React, Flutter, Spring Boot

Databases: PostgreSQL, Oracle, Firebase, PostGIS

DevOps: Docker, Docker Compose, Celery, Git, Ubuntu, CI/CD

Professional Experience

AI Solutions Consultant — Intex Management Services, Kenya (2024 – Present)

Integrated AI solutions using OpenAI and Hugging Face APIs, developed automation tools and RAG systems, and containerized deployments using Docker.

Freelance AI & Software Developer — Kenya (2023 – 2024)

Developed APIs, dashboards, and LLM-powered systems with Flutter and Django. Deployed web/mobile apps using Docker and PostgreSQL.

IT Systems Support Intern — Academic Labs & Freelance (2023)

Configured lab systems, handled network troubleshooting, and supported users in mixed Windows/Linux environments.

Highlighted Projects

Service Provider Connection Platform (2024)

Flutter, Django REST, PostgreSQL, GeoDjango, Docker — Built a full-stack platform connecting clients with verified providers, implementing location-based filtering and JWT auth.

AI Proposal Generator for NGOs (2025)

Django, OpenAI API, pgvector — Designed AI-assisted proposal drafting tool using GPT and vector search for contextual content generation.

CRM System for Insurance Agencies (2025)

Django REST, Next.js, PostgreSQL — Developed a CRM for insurance agencies with dashboards, policy tracking, and role-based access.

Personal Finance Management System (2025)

Spring Boot, Oracle, Kotlin — Built secure cross-platform finance management system with analytics and Android app integration.

AI-Powered Internal Assistant (2024)

GPT-4, LangChain — Created a helpdesk assistant integrating internal documentation for contextual query support.

Legal & Medical Chatbots (2024)

OpenAI API — Built compliant AI chatbots to support legal and medical professionals.

User Preference Predictor for LLMs (2025)

PyTorch — Trained model predicting preferred chatbot responses with 78% validation accuracy.

Education

BSc in Computer Science — Karatina University, Kenya (2020 – 2024)

Focus: Software Engineering, AI, Cybersecurity
